

## SEVEN PARTS OF A SCIENCE FAIR PROJECT

1. **Question:** Every Science Fair project begins with a question.
2. **Research:** Do a bit of research before you make your hypothesis. Display your research on your project.
3. **Hypothesis:** An educated guess. Tell what you think is going to happen.
4. **Materials:** Display a list of materials on your project.
5. **Procedures:** Give a step by step account of what you did for your experiment. (If possible, include pictures.)
6. **Results:** Include charts and graphs of the results of your experiment.
7. **Conclusion:** Display the answer to your question.
